## **BOROSILICATE GLASS**

We at Penta design and produce high quality lamps, with a contemporary design which are 100% made in Italy. In the course of our history we have interpreted the ideas of sought-after and never predictable designers, transforming their vision into objects in which formal beauty meets functional utility.

In everything we do, we are inspired by the art of master craftsmen, who put their heart, skill and knowledge into the service of their skilled hands.

While remaining faithful to our origins, we experiment with new solutions and thanks to the development and use of cutting-edge technology we are able to enrich our tradition with new expressive and aesthetic codes.

# MARBLE

# METAL

The innovation within our tradition shows us new languages to explore, new avenues to follow, new dreams to realize: inevitably our focus is turned towards the future, with elegant lamps that simultaneously relate to the home and the needs of a discerning customer. The rigor, precision and attention to detail and finishes characterise all our products, equally the use of refined materials, materials like wood, glass, metal, fabric. Never plastic. Our DNA, our ideas and our know-how are Italian, but our borders encompass the vastness of the world.

# GLO

## Carlo Colombo

Glo is an icon of our collection, a glass sphere enhancing the glare of light, in a game of reflections back and forth between the lamp and the space or among the very lamps. The rich palette of colours and the different dimensions of the suspension lamps are a toast to creativity.

# MOM & MOM GLOSSY

**Umberto Asnago**

Mom lamps are inspired by the Venetian tradition, and refer, in the shape and opaque finishings, to the classical Murano glass vases. Also available in wall variant, they look like precious stones.

From 2024, the suspensions model Tall, Slim and Fatty are available in mirroring finishes.

LIT

Umberto Asnago

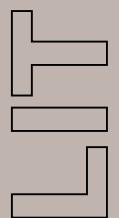

A mutable object that changes with the light. When off, Lit looks like a suspended sculpture, a minimal tube made precious by the reflections that play on the glass. When lit, the lamp reveals a bright, warm and gentle soul.

# HAIL

Bartoli Design

Conceived as an evolution of the Wonder and Storm collections, Hail is a ceiling lamp providing downward directional light. A long and essential metal stem opens up into a magical shape – a little bell. With its minimal and well-balanced shape it can be used either individually or be repeated in free multiple configurations.

## INFORMATIONS

Penta srl takes part in Consorzio Ecolight for the implementation of directive WEEE/RAEE 2002/95/CE e 2003/1087/CE relating to the collection and disposal of light fittings.

Most product-integrated LED sources have a Color Rendering Index (CRI) = 90.

Products with integrated LED sources characterized by Correlated Color Temperature (CCT) 2700K can be requested after technical verification and commercial evaluation.

All luminaires can only be sold with the single rosettes.

The reverse is also true: rosettes and multiple plates cannot be sold separately from pendants.  
All fixture are tested and guaranteed in their entirety: pendant + rosette or pendant(s) + multiplate.  
Any unauthorized installation will not be deemed compliant.

For multiple installations it is recommended to use bulbs with the same Correlated Color Temperature (CCT).

For updated data please refer to [www.pentalight.com](http://www.pentalight.com)

The glass is hand made and mouth-blown by the master glass blower, according to the traditional blowing techniques. Each item is carefully checked, therefore apparent imperfections, such as bubbles or nuances in the glass colour, have to be recognised as merits and signs of the artisan's craftsmanship.

Penta reserves the right to change, better and improve its models without notice, even if these improvements might change the aesthetic appearance of the proposed solutions.
